Attachment 7:
Production data reports

30.12.2019

Production data reports

This attachment provides an overview of reports that should be available in the Production Data Report Generator described in requirement PR25 in SSA-T&L Appendix 1B and chapter 4.5.2 in SSA-T&L Appendix 1A. Some of the reports will solely contain confidential data and should only be available to Diskos Members who are entitled to the data. **Please note:** this list is not necessarily exhaustive.

Wellbore production/injection reports

This function generates standard reports for a given period of time and unit of measurement for wellbore production/injections for either:

- a) One wellbore
- b) All wellbores within one or multiple aggregated fields
- c) All wellbores ordered by aggregated fields and wellbore names from NCS

Gas sales for export

This function generates standard reports for a given period of time and unit of measurement of gas sales for export in either:

- a) Gas sales per terminal
- b) Gas sales per seller
- c) Gas sales per buyer country

This function also generates standard reports for a given period of time and unit of measurement for gas sales on the NCS for either:

- a) One or multiple aggregated fields
- b) Gas sales per seller

Production/Injection allocated report

This function generates standard reports for a given period of time and unit of measurement, split by the Norwegian/UK share (based on split factor per field) or total of allocated productions/injections for either:

- a) One or multiple installations
- b) One or multiple field aggregations
- c) Total NCS (Sum field aggregations)

Sale of liquid report

This function generates standard reports for a given period of time and unit of measurement of sales of liquid per boat on sales point (terminal/field level) for either:

- a) One or multiple terminals or fields
- b) Sales from all or only Norwegian companies per salespoint
- c) Sales per destination country split by Norwegian and UK companies or total

Fuel, flare and cold vent report

This function generates standard reports for a given period of time, unit of measurement and split according to the Norwegian/UK share (based on split factor per field) of fuel consumption for either:

- a) One or multiple installations
- b) One or multiple field aggregations (aggregated from installation)
- c) One or multiple terminals
- d) Total NCS

Fiscal quantities report

This function generates standard reports for a given period of time and unit of measurement of fiscal quantities report per:

- a) One or multiple installations
- b) One or multiple terminals

Petroleum import report

This function generates standard reports for a given period of time and unit of measurement of petroleum import for one or more terminals.

Stored quantities report

This function generates standard reports for a given period of time and unit of measurement of stored quantities per:

- a) One or multiple terminals
- b) One or multiple aggregated fields and total NCS
- c) One or multiple installations
