

Technical drawing of a roof truss system. The drawing shows a perspective view of the roof structure. Key components include:

- Rafter (Stolper):** A diagonal structural member supporting the roof deck, labeled with a callout: "48x73 mm IMP stolper for rekkverk".
- Ridge Beam (Rekkverk):** A horizontal structural member at the peak of the roof, labeled with a callout: "Rekkverk 100x100 mm".
- Purlin (Stolper):** A horizontal structural member supporting the roof deck, labeled with a callout: "Stolper 100x100 mm".
- Roof Deck (Dekkeplate):** The outer layer of the roof, labeled with a callout: "Dekkeplate 100x100 mm".
- Truss (Teg):** The main structural framework, labeled with a callout: "Teg 100x100 mm".
- Roof Slope:** Indicated by a dashed line and a label: "Dakfot 1:12".

Bjelkelag 48x148 mm, IMP

Terrassebord 28x120 mm IMP

Fuge 6 mm

Bjelkelag 2x(48x148) mm IMP

Mellombord over bjelkelaget 28x48 mm IMP

Technical cross-section diagram of a roof structure. The diagram illustrates the following layers and components from top to bottom:

- Mellombord 28x48 mm IMP**: A sloped wooden board layer.
- Terrassebord Fuge 6 mm**: A horizontal wooden board layer with a 6 mm gap.
- 6**: A numerical label indicating a specific dimension or layer.
- 28x120 mm IMP**: A horizontal wooden board layer.
- 48 mm, IMP**: A horizontal wooden board layer.
- 3x148) mm IMP**: A horizontal wooden board layer.
- er bjelkelaget 28x48 mm IMP**: A horizontal wooden board layer.

The diagram shows a complex arrangement of these layers, with some sections being sloped and others horizontal, indicating a multi-level or gabled roof structure.
